The Associate of Applied Science degree in Television prepares students for entry level positions in the broadcasting and television industry.

The general education requirements are designed to encourage students to develop critical and creative thinking, communication, and technical skills utilized in the television/mass media industry.

Students must complete the general education, program requirements, and choose television as their program of emphases to complete the two-year degree.

The TV program is designed to prepare students for a career in TV production mastering television preproduction, production and postproduction skills. Students also have a one-of-a kind opportunity to gain expertise and assess their progress by crewing live television productions through Wyoming PBS.

An individual choosing a career in television production must display technical expertise in television camera operations, directing, producing, and nonlinear editing.

▶ *About* CENTRAL

Central is a two-year community college located in the beautiful and historically significant Wind River valley. A variety of distance delivery methods is available including Internet and live interactive video. Face-to-face instruction is also available at CWC outreach centers in Thermopolis, Dubois, Jackson, Lander and the Wind River Indian Reservation.

CWC offers more than 100 degree programs, about half designed to take the student to a transfer institution. The college's career and technical programs provide students with "real world" experiences, preparing them to go directly to work. Central offers a number of guaranteed scholarships to graduating high school seniors based on grade point average.
